Introduction to Poultry Production

Poultry production is a vital segment of the global agriculture industry, providing meat and eggs that are dietary staples worldwide. Efficient management and modern techniques can significantly enhance productivity, profitability, and animal welfare. Whether you are starting a small backyard flock or managing a large commercial enterprise, understanding the fundamentals of poultry production is crucial.

Types of Poultry and Their Management

Poultry encompasses various bird species, each with specific management needs:

Chickens

Chickens are the most common poultry species, raised primarily for meat (broilers) and eggs (layers). Management practices differ based on the purpose:

- Broilers: Fast-growing breeds raised for meat within 6-8 weeks. - Layers:

Breeds optimized for high egg production, typically starting at 18-20 weeks of age.

Turkeys

Turkeys are primarily raised for meat. They require spacious housing, proper nutrition, and disease prevention protocols.

Other Poultry
