However, scanned PDFs that consist only of images are far less effective. Without readable text, search engines cannot fully index the content. Using text-based PDFs or applying optical character recognition (OCR) ensures that content remains searchable and indexable.

Optimizing PDF file names for SEO

The file name of a PDF plays a significant role in search visibility. Descriptive, keyword-rich file names help search engines and users understand the document before opening it. Instead of generic names, using clear and relevant terms related to A Complete Mathematics Course For Secondary Schools improves both SEO and user trust.

Hyphens should be used to separate words in file names, as they are more search-engine-friendly. Avoid unnecessary numbers or symbols that add no context or value to the document's topic.

Title, metadata, and document properties
