The Evolution of Special Forces Hand-to-Hand Combat

Historical Foundations and Military Roots

Hand-to-hand combat has been an integral part of military doctrine since ancient times, with roots tracing back to martial arts practiced by various cultures. Special forces units, however, have historically prioritized stealth, speed, and efficiency, leading to the development of combat systems suited for covert operations. During World War II, units like the British Commandos and American OSS began integrating close-quarters combat techniques learned from various martial arts and street-fighting styles. These early efforts emphasized practical techniques for incapacitating enemies quickly, often without weapons. Post-war, as conflicts evolved into asymmetric warfare, special forces units began formalizing their hand-to-hand combat systems, blending traditional martial arts with modern tactics. The Cold War era saw the rise of specialized training programs tailored to the unique needs of elite operators.
