What is the Army DODIC List?

Definition of DODIC

DODIC stands for Department of Defense Identification Code. It is a standardized alphanumeric code assigned to individual items of supply within the U.S. Army and other branches of the Department of Defense (DoD). The primary purpose of the DODIC is to uniquely identify specific items, including spare parts, equipment, tools, and supplies, to streamline logistics operations.

Purpose and Importance

The Army DODIC list serves several vital functions:

4. Supports maintenance, repair, and replacement activities by providing precise item data.
5. Helps in cost analysis and inventory forecasting by providing detailed item categorization.

Structure of the DODIC Code

Format and Components

The DODIC is typically a three-character alphanumeric code. Its structure is designed to embed specific information about the item, such as its category and characteristics. For example: - The first character often indicates the material or general type. - The second character may specify the item's purpose or a subcategory. - The third character usually distinguishes between different items within the same category.

Example of DODIC Codes

| DODIC | Description | Usage Example | ||| | AAB | General purpose item, specific code |
AAB—Standard issue flashlight | | B12 | Material type and item category | B12—Military-grade batteries | | C34 | Specialized tools or equipment | C34—Field communication device | The specific meaning of each code is maintained within the Army's logistics databases, such as the Army Master Data File (AMDF).
