Sample "The Day After Tomorrow" Worksheet Questions and Answers

Below are some sample questions along with comprehensive answers to illustrate the typical content:

1. What is the primary cause of the extreme weather events depicted in the film?

The film attributes the extreme weather events to a sudden and severe disruption of the Earth's climate system, primarily caused by global warming leading to the shutdown of the Atlantic Meridional Overturning Circulation (AMOC). This disruption results in rapid cooling in the Northern Hemisphere, triggering an ice age.

2. Explain the significance of the term "climate change" as used in the context of the movie.

In the movie, "climate change" refers to the long-term alteration of Earth's climate, specifically the rapid and severe shifts in weather patterns caused by human-induced global warming. It highlights how human activities accelerate natural processes, leading to catastrophic environmental consequences.

3. What safety measures are suggested in the worksheet for surviving extreme weather events?

Suggested safety measures include seeking shelter indoors, avoiding travel during storms, staying informed through weather alerts, having emergency kits prepared, and following evacuation orders issued by authorities.

4. Discuss the scientific accuracy of the depiction of a sudden ice age. How plausible is this scenario?

The depiction of a sudden ice age in the film is dramatized for cinematic effect; in reality, ice ages develop over thousands or millions of years. However, the concept of abrupt climate shifts due to disruptions in ocean currents is scientifically plausible, although such rapid changes are less common and would likely occur over a longer timescale.
