Prevalence and Trends

Recent studies indicate a disturbing rise in mental health issues among adolescents, exacerbated by factors such as social media influence, academic pressures, and the ongoing impacts of the COVID-19 pandemic. According to the National Institute of Mental Health, approximately 1 in 5 adolescents experience a mental health disorder, yet many go undiagnosed or untreated. Suicide remains a leading cause of death among teenagers, highlighting an urgent public health concern. The case of Aubreigh Wyatt exemplifies how these issues can silently affect even the most seemingly resilient young individuals.

Risk Factors and Warning Signs

Parents, teachers, and peers should be vigilant and proactive in addressing concerns, fostering environments where mental health is prioritized and stigma is diminished.

Strategies for Prevention and Support
