Sample Sanitation Exam Questions and Answers

Below is a curated selection of typical questions, accompanied by comprehensive answers that reflect best practices and current standards in the field.

1. What are the primary objectives of a sanitation program?

Answer:

The primary objectives of a sanitation program are to:

1. Prevent and control the spread of communicable diseases.
2. Promote hygienic practices among community members.
3. Ensure the availability and proper maintenance of sanitation facilities.
4. Protect water sources from contamination.

1. Describe the importance of water treatment in sanitation.

Answer:

Water treatment is crucial in sanitation because it ensures that water supplied for domestic, industrial, or recreational use is safe and free from harmful pathogens, chemicals, and pollutants. Proper treatment methods—such as filtration, chlorination, or UV disinfection—eliminate disease-causing

microorganisms like bacteria, viruses, and protozoa. This reduces the incidence of waterborne diseases such as cholera, dysentery, and typhoid, directly impacting public health. Additionally, treated water preserves the environment by preventing contamination of natural water bodies.

1. List and explain three common methods of waste disposal.

Answer:

1. Open Dumping: The indiscriminate disposal of waste in open areas. While simple and inexpensive, it poses health risks, attracts pests, and contaminates soil and water sources.
1. Sanitary Landfilling: Waste is collected and buried in designated sites with engineered liners and drainage systems to prevent leachate and gas escape. It is considered environmentally friendly when properly managed.
1. Incineration: Waste is burned at high temperatures, reducing volume and destroying pathogens. It is suitable for hazardous waste but requires pollution control measures to minimize air emissions.

Each method has its advantages and disadvantages; selection depends on waste type, community needs, and environmental considerations.

1. What are the key characteristics of a good sanitation facility?

Answer:

A good sanitation facility should be:

1. Accessible: Easily reachable by all community members, including vulnerable groups.
