Sample OET Reading Passage for Nurses 20

Below is an example of a typical OET reading passage for nurses. This sample reflects the kind of content and questions you may encounter in the exam.

Sample Passage:

Title: Managing Postoperative Wound Care in Surgical Patients

Effective postoperative wound care is vital to prevent infection, promote healing, and ensure optimal recovery for surgical patients. Nurses play a key role in monitoring wound status, providing patient education, and implementing appropriate dressings and hygiene protocols.

Recent studies indicate that maintaining a clean and moist wound environment accelerates healing and reduces complications. The choice of dressing depends on the wound type, exudate level, and patient factors. Common dressings include hydrocolloids, alginates, and foam dressings, each with specific indications and benefits.

Monitoring signs of infection—such as redness, swelling, increased pain, and purulent discharge—is essential. In cases where infection is suspected, prompt assessment and communication with the medical team are necessary. Additionally, educating patients about wound care practices at home reduces the risk of postoperative infections.

Sample Questions:

1. What is the primary goal of postoperative wound care?
2. List three types of dressings mentioned in the passage.

Annotations are particularly useful for students and professionals who revisit documents frequently. Saving annotated versions ensures that notes remain available, reducing the need for separate files or external note-taking systems.

Managing PDF file size and performance

Large PDF files may load slowly, especially on older devices or limited hardware. Optimizing PDFs improves performance without sacrificing quality. Techniques such as image compression, font optimization, and removal of unnecessary metadata help reduce file size while preserving content clarity in Oet Reading Sample For Nurses 20.

For extremely large documents, splitting content into smaller PDF sections can improve navigation and responsiveness. This approach also makes file sharing faster and more reliable.
